MINIMUM LICENSING REQUIREMENTS FOR CHILD CARE CENTERS

100 CHILD CARE LICENSING

The "Child Care Facility Licensing Act" Ark. Code Ann. §20-78-201-220, as amended, is the statutory authority for licensing child care facilities. This Act created the Division of Child Care and Early Childhood Education and authorized the Division to establish rules and regulations governing the granting, revocation, denial and suspension of licenses for child care facilities and the operation of child care facilities in this state. The Minimum Licensing Requirements for Child Care Centers are the Division's rules and regulations for Child Care Centers.

The Child Care Facility Licensing Act designates the Arkansas Department of Human Services, Division of Child Care and Early Childhood Education as the administrative agency responsible for administering the Act in accordance with the Minimum Licensing Requirements for Child Care Centers. The Division is authorized to inspect and investigate any proposed or operating Child Care Centers and any personnel connected with the Center to determine if the facility will be or is being operated in accordance with the Child Care Facility Licensing Act and the Minimum Licensing Requirements for Child Care Centers.

The licensing requirements contained in this manual apply to group child care. (Refer to the Minimum Licensing Requirements for Day Care Family Homes for the requirements that apply to child care provided in a day care family home.)

The owner should be aware of applicable federal laws which may affect the operation of the facility. Child care programs are among the public accommodations that must comply with the Americans with Disabilities Act. (ADA)

Under federal civil rights laws, a facility may not discriminate on the basis of race, color, sex, religion, national origin, physical or mental handicap, or veteran status.

The Child Care Licensing Unit will notify the applicable federal agency at any time they become aware of or are advised of violations of the federal Civil Rights Act or the Americans with Disabilities Act.

Laws relevant to the operation of child care facilities are available upon request.

The following standards are the minimum licensing requirements which shall be met by persons or organizations which operate a child care facility. In recommending a license be issued, the Division of Child Care and Early Childhood Education works in coordination with the local and state Health departments, Fire Departments and City Planning or Zoning Departments. Persons considering opening or expanding a child care facility shall immediately contact these individual departments for inspection and information on their separate regulations. Clarification or questions shall be directed to the appropriate departments.

101 General Requirements

1. Child Care Centers shall maintain compliance with the licensing requirements at all times. To be in substantial compliance, the Child Care Center shall meet all essential standards

necessary to protect the health, safety and welfare of the children attending the Child Care Center. Essential standards include but are not limited to those relating to issues involving fire, health, safety, nutrition, discipline, staff/child ratio and space. Failure to comply with any of the licensing requirements for Child Care Centers may result in any of the following adverse actions:

- a. Denial of an application for a license or for church exempt status
- b. Revocation or suspension of a license or church exempt status
- c. Issuance of a provisional license or church exempt status
- d. Imposition of penalties

The following factors may be considered when determining the appropriate adverse action:

- a. Severity of the deficiency cited
 - b. Number of violations cited
 - c. Frequency of violations cited
 - d. Past history of compliance
 - e. Willingness/ability to correct violations
2. Each Child Care Center shall be reviewed by the Child Care Licensing unit to determine whether the facility is in compliance with all the Minimum Licensing Requirements for Child Care Centers. Child Care Licensing staff shall have access to Child Care Centers for the purpose of conducting inspections, reviews, and complaint investigations. Denial of access to the facility or to interview children may result in any of the adverse action described above. A caregiver shall not use profanity or speak in an abusive manner when children are present. The caregiver shall also cooperate with licensing staff during licensing visits.
 3. Any facility that has not provided care to children for a period of one year shall be closed unless a written request is made by the licensee stating why closure should not take place.
 4. **Falsification of any document or the submission of false information to the Child Care Licensing Unit or any other unit of the Division may constitute grounds for revocation of the license. (Falsification means the submission of untrue information, whether by statement or omission.)**

102 Licensing Procedures

1. Application -- An application shall be obtained from the Child Care Licensing Unit. The completed application shall be submitted to the Child Care Licensing Unit for review and approval. A completed application shall consist of:
 - a. A signed application form with a designated person who assumes legal responsibility for operation of the child care facility
 - b. Name of proposed director and their qualifications
 - c. A description of the services that will be provided to the children
 - d. Verification that criminal record checks and child maltreatment central registry checks have been initiated on all owners, operators and employees of the Child Care Center
 - e. Health department, fire department, and zoning approval
 - f. Floor plan
 - g. Clear written guidelines of responsibility for the board and administrator, if the facility has a governing board

2. Time for processing: The Licensing Specialist has sixty days to submit a recommendation to the Division.
3. Licensing fees
 1. Each facility shall submit an annual license fee as long as the facility is in compliance with the Minimum Licensing Requirements for Child Care Facilities. A facility license is determined by combining the maximum license capacity of all licenses located within the same premises.
 - a. Facilities serving up to 17 children - \$15 per year
 - b. Facilities serving 17 to 99 children - \$50 per year
 - c. Facilities serving 100 or more children -- \$100 per year
 2. Upon review and determination of a licensing recommendation by the Child Care Licensing Specialist, the Specialist shall issue a Notice of License Fee Due to the facility.
 3. The Division shall not issue a license unless the required license fee has been paid.
 4. A copy of the license fee notice shall be submitted at the time of licensure recommendation.
 5. The fee schedule shall apply to all child care facility recommendations for licensure as follows:
 - a. New Provisional License – (Provisional License for new operation to be issued for a period of twelve months.) A one-year license fee shall be paid prior to the issuance of a provisional license.
 - b. New Regular License or Conversion from provisional to regular status - A license fee shall be paid prior to the issuance of a new license.
 - c. Conversion to Provisional Status - No license fee is due for licenses converted to provisional status during the term of a regular license.
 6. A second notice of license fee due will be sent to facilities failing to submit the required license fee (Notice of License Fee Past Due). This notice will be sent 20 days after the initial notice of fee due. Failure to submit a license fee within 20 days of the receipt of the past due notice will result in action to suspend the license until such time as the fee is paid.
 7. Refunds of license fees paid are made only when the Division does not approve issuance of a license. There shall be no refunds of license fees paid for voluntary closure of a facility or for Division action to revoke or suspend a license.
 8. All license fees paid to the Division shall be deposited in a special Child Care Provider's Fund. This Fund shall be used to meet the cost of conducting statewide criminal record checks, with the remaining money used for training or materials to be loaned to child care providers. Funds to cover the cost of statewide criminal checks shall not exceed the total fees collected and deposited in the fund.

4. *A pre-application consultation meeting shall be required for all applicants for a license prior to the approval of the application. This meeting shall be offered to the applicant within 30 days of the receipt of the application.*
5. License -- The Child Care Licensing Unit shall conduct a licensing study of each Child Care Center to determine eligibility for a license. The facility shall be approved by the Child Care Licensing Unit before a license may be issued by the Division. A license for a Child Care Center shall specify:
 - a. The name and address of the facility
 - b. The owner/operator of the Child Care Center
 - c. The number of children authorized for care at the Child Care Center
 - d. The expiration date of any provisional licenses
 - e. The type of care the Child Care Center will be providing
6. License -- Non-transferable -- A license for a Child Care Facility or approval for church-operated exempt status shall apply only to the address and location stated on the license or approval issued. It shall not be transferable from one holder of the license or approval to another, or from one place to another. If the location of a Child Care Facility is changed, or the operator of the Child Care Facility is changed, then the license or approval for that Child Care Facility shall be automatically closed on such a change. The Child Care Facility shall notify the Licensing Unit of a change of location or ownership.
7. Compliance -- On-site inspections of Child Care Centers are conducted by the Child Care Licensing Unit on a routine basis to determine a facility's continued compliance with standards. The Child Care Licensing Unit shall have the authority to make both scheduled and unscheduled visits throughout the license to determine continued compliance with the requirements and to offer consultation and technical assistance.

Violations of rules are documented in writing by use of the licensing compliance record. Documentation shall include:

- a. Reference to the specific rule violated
- b. A factual description of the nature of the violation and how the Child Care Center failed to comply
- c. A date of expected corrections

The Child Care Licensing Specialist may increase unscheduled monitor visits where numerous or severe violations of standards are cited.

If a violation is of imminent threat to the health, safety and welfare of the children attending the Child Care Center, corrective action or compliance shall be obtained within 24 hours in order to insure the health, safety and welfare of the children in care. If a Child Care Center violates an administrative standard or a standard that does not directly threaten the immediate health, safety or welfare of the children in care, these violations shall be corrected within a reasonable time as mutually agreed upon by the Child Care Licensing Unit and the Child Care Center.

Once a violation has been corrected, the correction will be documented on the Licensing Compliance Record and a copy provided to the Child Care Center.

8. License - Provisional -- The Child Care Licensing Specialist shall recommend a provisional license when the facility is newly opened, a facility has been acquired by new owners whose compliance history has not been determined, or the facility is not operating in substantial compliance, but the deficiencies are not so numerous, frequent or severe as

to jeopardize the health, safety, and welfare of children. A provisional license shall not exceed twelve (12) months in length.

At the end of the provisional license, the Division may in its discretion:

- a. Issue a regular license
 - b. Revoke the license
 - c. Suspend the license
 - d. Issue a successive provisional license in conjunction with the imposition of a civil penalty
9. License Suspension—The Division may suspend a license when the CCLS determines that the facility has serious areas of non-compliance, but the facility would be able to resume normal operation when the harmful conditions are eliminated.
- If granted, the suspension order remains in effect until the order expires or until the Division determines that the problems necessitating the suspension order have been resolved. The suspension of a license may not exceed (12) months. If the Division finds that the terms of the suspension order have been met prior to the expiration of the suspension period, the Division retains the discretion to reinstate the license. If the terms of the order have not been met, the Division may revoke the license.
10. License Revocation- The Division may revoke a license when any of the following situations occur:
- a. The facility fails to maintain substantial compliance with licensing requirements
 - b. The facility fails or refuses to correct cited deficiencies in a timely manner
 - c. The facility fails to insure the health, safety and welfare of children in care

The revocation of a license nullifies and cancels the license. At the time of a final determination of revocation of the license by the Division, the Division shall specify in the revocation order the terms of the revocation. The licensee shall not be eligible to reapply for a license for a minimum of one (1) year or longer, if specified in the revocation order. Related parties shall not be eligible to apply for a license for the same specified period. Related parties are defined as immediate family members, members of Board of Directors, persons or entities associated or affiliated with, or which share common ownership, control, or common board members or which have control of or is controlled by the licensee. An immediate family member is defined as a spouse, step and in-law relationships, a child, a natural or adoptive parent, a sibling, a grandparent, a grandchild or a son or daughter-in-law. (Applicants who are denied a license or registration due to this requirement may appeal the denial to the Child Care Facility Review Panel.) Facilities wishing to be re-licensed must submit a new application for licensure for review and approval by the Division. Approval must be obtained and a new license issued before the facility provides care to a licensable number of children.

103 APPEAL OF LICENSING ACTIONS

A licensee or applicant for license may request an appeal of any of the following licensing actions;

- Adverse licensing actions (revocation or suspension of a license, conversion to a provisional license or denial of an application for a license)
- Founded licensing complaints
- Denials of alternative compliance requests
- Cited noncompliance with the published standards

An appeal may be initiated on any of the above actions by requesting an appeal in writing to the Licensing Specialist or Licensing Supervisory Staff. Requests to appeal adverse licensing actions must be mailed within ten (10) calendar days of the receipt of the notice of the adverse action. Requests to appeal licensing actions, other than adverse, must be mailed within twenty (20) calendar days from receipt of the notification of the action. The request to appeal shall include a statement of the action(s) taken by the Division and the reason(s) the licensee or applicant for license disagrees with that action. The request to appeal will be reviewed by the Licensing Supervisor and the Licensing Administrator. If the appeal is not resolved to the satisfaction of the licensee or applicant for license, the matter will be referred to the Child Care Appeal Review Panel for hearing. (This appeal process also applies to Church Operated exempt facilities.) **(Additional information regarding the appeal procedures and the Child Care Appeal Review Panel is available on request.)**

104 ALTERNATIVE COMPLIANCE

1. The Division may grant alternative compliance with the Minimum Licensing Requirements for Child Care Centers if the Division determines that the alternative form of compliance offers equal protection of health, safety and welfare to children and meets the basic intent of the requirements for which the alternative compliance was sought.
2. The Division shall consider all requests for alternative compliance with the Licensing requirements except those requirements that are enforced by the Department of Health, Local Fire Marshal or State Fire Marshal's office and applicable city ordinances including zoning.
3. To request alternative compliance, the following procedure shall be initiated by the person responsible for the operation of the facility:
 1. The applicant/licensee shall submit the request for alternative compliance in writing.
 2. The request shall include:
 - a. The specific standards for which alternative compliance is sought
 - b. An explanation of how the alternative form of compliance is equal to or exceeds the stated requirements
 - c. Full justification and description of what the alternative compliance method will be and the method by which the facility will carry out this plan to continue to provide for the health, safety and welfare of children as intended by the requirements
 - d. The applicant/licensee shall provide clear and supportive evidence and, upon request of the Division, an expert's opinion on the effect of the request on health, safety and welfare of the children.
4. A separate written request shall be submitted for each requirement of which alternative compliance is sought. The approved alternative compliance is effective for the duration of the license unless a shorter time frame is specified.
5. The granting of alternative compliance for a requirement shall in no way constitute a precedent. If an alternate means of complying with the requirement is granted by the Division and the facility fails to satisfactorily implement this alternate means, the original requirement for which alternative compliance was sought shall become immediately enforceable.

6. The Division shall have the right to obtain an expert opinion to corroborate expert opinions provided by the applicant/licensee.
7. The Division shall have the right to deny requests for alternative compliance when it finds that such requests do not adequately protect the health, safety and welfare of children and do not meet the intent of the requirements.
8. All requests for alternative compliance shall be answered in writing by the Division.

1. Act 245 of 1983 defines those facilities that may apply for an exemption from the obtaining of a license to operate a child care facility and the process through which such exemption may be granted. 4. The Division shall consider each request for exemption and shall review the Division staff's written report in determining a facility's substantial compliance with published standards.

Minimum Licensing Requirements for

Child Care Family Homes

Foreword

LICENSING AUTHORITY

"The Child Care Facility Licensing Act", Act 20-78-210-220, as amended, is the legal authority under which the Division of Child Care and Early Childhood Education prescribes minimum standards for a variety of child care facilities under the Act.

Department Responsibility

The Division of Child Care and Early Childhood Education (referred to hereafter as The Division) under the Department of Human Services is directly responsible for the inspection and evaluation of all licensed homes as defined in Section 101 of the Minimum Licensing Requirements for Child Care Family Homes.

The Division has the power to establish rules, regulations, and standards for licensing and operation of child care facilities. This includes all powers with respect to granting, revocation, denial, and suspension of licenses. Decisions regarding special situations shall be made on an individual basis by the Division. Information regarding an appeal process is available upon request.

The owner should be aware of any applicable city or county zoning ordinances or codes or neighborhood covenants which may limit the number of children in care or impose additional safety requirements. The Division will share information on the location and status of licensed homes or applications for a license with any city or county that requests this information.

The owner should be aware of applicable federal laws which may affect the operation of the facility. Child care programs are among the public accommodations that must comply with the Americans with Disabilities Act. (ADA).

Under federal civil right laws, a facility may not discriminate on the basis of race, color, sex, religion, national origin, physical or mental handicap, or veteran status.

The Child Care Licensing Unit will notify the applicable federal agency at any time they become aware of or are advised of violations of the federal Civil Rights Act or the Americans with Disabilities Act.

Laws relevant to the operation of child care facilities are available upon request.

Application of Requirements

In determining a recommendation for licensing the home shall be reviewed by a Child Care Licensing Specialist to determine that the home is in substantial compliance with the requirements.

Substantial Compliance means compliance with all essential standards necessary to protect the health, safety and welfare of the children attending the Child Care Family Home. Essential standards include but are not limited to those relating to issues involving fire, health, safety, nutrition, discipline, staff/child ratio and space.

LICENSING PROCEDURE

1. Any applicant applying for a home license may contact the local Division Office or Child Care Licensing Specialist to obtain information and/or the necessary application and related forms.
2. Upon receipt of a signed application the Child Care Licensing Specialist shall schedule an appointment to inspect, evaluate, and make a recommendation for consideration of license to the Division.
3. The Child Care Licensing Specialist shall make unscheduled visits throughout the year to determine continued compliance of standards and to offer consultation and technical assistance.
4. The license as issued shall apply only to the home's location at the time of licensing. The licensee shall notify the Child Care Licensing Specialist's office of a change of location or ownership at which time a new study shall be conducted. Upon issuance of a license, the license shall remain in effect as long as compliance is maintained with the Minimum Licensing Requirements for Child Care Family Homes.
5. If the Division Staff (CCLS) finds that an applicant meets the licensing requirements for a Child Care Family Home or has a reasonable expectation of correcting deficiencies in a reasonable time, the Child Care Licensing Specialist may recommend a provisional license for operation of a child care facility to the Division. The provisional license shall be in effect for a reasonable period, not to exceed twelve months. This time frame shall be specified in the provisional license. Approval must be obtained and a new license issued before the home provides care to a licensable number of children.

ALTERNATIVE COMPLIANCE

 - The applicant/licensee shall provide clear and supportive evidence, and upon request of the Division, an expert's opinion on the effect to the health, safety and welfare of children and how it will protect through the alternative means of compliance

4. A separate written request shall be submitted for each requirement for which alternative compliance is sought. The approved alternative compliance is effective for the duration of the license unless a shorter time frame is requested or approved.
5. The granting of alternative compliance for a requirement shall in no way constitute a precedent. If an alternative means of complying with the requirement is granted by the Division and the facility fails to implement satisfactorily this alternate means, the original requirement for which alternative compliance was sought shall become immediately enforceable.
6. The Division shall have the right to obtain an expert opinion to corroborate expert opinions provided by the applicant/licensee.

Foreword

Dear Applicant for Registration:

Thank you for your interest in the Voluntary Registry as a Registered Child Care Family Home. The following information is for your benefit to inform you of your rights and responsibilities as a Registered Child Care Family Home provider.

An application packet may be obtained from the Child Care Licensing Central Office or from any Child Care Licensing Specialist. It may take two to three weeks from the date you submit your application to receive a call from a Child Care Licensing Specialist who will schedule a visit to your home. During this visit, the Specialist will review the Registry guidelines with you. The Specialist will also provide technical assistance and information on resources and training opportunities that are available to you.

Every effort is made to process your application within 30 days. If your application is not approved, you will be given written notice as to the reason for the denial of your application. You may then appeal this decision if you choose or reapply at a later date. Should you choose to appeal the decision, additional instructions regarding the appeal process will be provided to you by the Child Care Licensing unit.

If your application is approved, the registration will be effective from the date of issuance and will remain in effect on an ongoing basis. The registration may be revoked or suspended for repeated or severe violation of the rules and standards for Voluntary Registration as established by the Division of Child Care and Early Childhood Education. In the event that your registration is revoked or suspended, you have a right to appeal that decision.

The Registration Certificate is effective only for the name and address stated on the application and certificate. If you move or if the name of the provider changes, a new application must be submitted. Re-certification of your registration is required on an annual basis. During the annual re-certification process, it will be necessary for you to submit updated information on all household members.

Please note: Arkansas law requires anyone providing care to six or more children at any time, from more than one family, to obtain a Child Care Family Home License.

Child care is a worthwhile profession. You will be providing a much-needed service to your community and will have a tremendous and lasting impact on the development of the children in your care. Although, by caring for five or fewer children you are not required by law to be licensed, you may chose to become licensed, regardless of the number of children in care. Should you wish to become licensed, you will need to contact the Child Care Licensing Specialist who has been assigned to work with you. Your Specialist will be happy to meet with you to discuss the licensing requirements and provide you with an application packet.

If you have any questions, please call the Child Care Licensing office at 501-682-8590.

Department Responsibility

The Division of Child Care and Early Childhood Education (referred to hereafter as The Division) under the Department of Human Services is directly responsible for the inspection and evaluation of all Registered Homes.

The Division has the power to establish rules, regulations, and standards for licensing/registration and operation of child care facilities. This includes all powers with respect to granting, revocation, denial, and suspension of licenses and registrations. Information regarding the appeal process is available upon request.

The owner should be aware of any applicable city or county zoning ordinances or codes or neighborhood covenants which may limit the number of children in care or impose additional safety requirements. The Division will share information on the location and status of registered homes with any city or county that requests this information.

The owner should be aware of applicable federal laws that may affect the operation of the facility. Child care programs are among the public accommodations that must comply with the Americans with Disabilities Act. (ADA).

Under federal civil right laws, a facility may not discriminate on the basis of race, color, sex, religion, national origin, physical or mental handicap, or veteran status.

The Child Care Licensing Unit will notify the applicable federal agency at any time they become aware of or are advised of violations of the federal Civil Rights Act or the Americans with Disabilities Act.

Application of Requirements

To determine a recommendation for registration, the applicant's home shall be reviewed by a Child Care Licensing Specialist to determine that the home is in substantial compliance with the requirements.

Substantial Compliance means compliance with all essential standards necessary to protect the health, safety and welfare of the children attending the registered home. Essential standards include but are not limited to those relating to issues involving fire, health, safety, nutrition, and behavior management.

REGISTRATION PROCEDURE

1. Any applicant applying for Registration may contact the local Division Office or Child Care Licensing Specialist to obtain information and/or the necessary application and related forms.
2. *A pre-application consultation meeting shall be required for all applicants for registration prior to approval of the application. This meeting shall be offered within 30 days of receipt of the application.*
3. Upon receipt of a signed application the Child Care Licensing Specialist shall schedule an appointment to inspect, evaluate, and make a recommendation for consideration of registration to the Division.
4. The Child Care Licensing Specialist shall make unscheduled visits throughout the year to determine continued compliance of standards and to offer consultation and technical assistance.
5. The registration, as issued, shall apply only to the home's location at the time of registration. The registrant shall notify the Child Care Licensing Specialist's office of any change of location or ownership at which time a new study shall be conducted. Upon issuance of a registration, the registration shall remain in effect as long as compliance is maintained.
6. If the Licensing Specialist finds that an applicant for a registered home meets the registration requirements or has a reasonable expectation of correcting deficiencies within specified time frames, the Child Care Licensing Specialist may recommend a provisional registration to the Division. The provisional registration shall be in effect for a period of time, not to exceed twelve months. This time frame shall be specified in the provisional registration. (The Licensing Specialist has 60 days to submit a recommendation to the Division for a provisional registration.)

7. At the time of a final determination by the Division of revocation or suspension of a registration, the Division shall specify in the order the period and terms of the action. A revocation of a registration shall be set for no less than one year but may be for a longer term as established by the Division. Related parties shall not be eligible to apply for registration for the same specified period. (Related parties are defined as immediate family members, members of Board of Directors, persons or entities associated or affiliated with, or which share common ownership, control, or common board members or which have control of or is controlled by the registrant. An immediate family member is defined as a spouse, step and in-law relationships, a child, a natural or adoptive parent, a sibling, a grandparent, a grandchild or a son or daughter-in-law.) The revocation of a registration places that registration in a null and void status. At the completion of the terms of revocation, homes wishing to be re-registered must submit a new application for registration for review and approval by the Division.

ALTERNATIVE COMPLIANCE

1. The Division may grant alternative compliance with the Minimum Standards Required for Registered Child Care Homes, if the Division determines that the alternative form of compliance offers equal protection of health, safety and welfare to children and meets the basic intent of the requirement for which the alternative compliance is sought.
2. The Division shall consider all requests for alternative compliance with the Registration Requirements except those requirements which are enforced by the Department of Health, Local Fire Marshal or State Fire Marshal's Office.
3. To request alternative compliance, the following procedure shall be initiated by the person responsible for the operation of the facility:
 - a. The applicant/registrant shall submit the request for alternative compliance in writing.
 - b. The request shall include:
 - The specific standard for which alternative compliance is sought.
 - An explanation of how the alternative forms of compliance is equal to, or exceeds, the requirement.
 - Full justification and description of what the alternative compliance method will be and the method by which the facility will carry out this plan to be able to continue to provide for the health, safety, and welfare of children as intended by the requirement.
 - The applicant/registrant shall provide clear and supportive evidence, and upon request of the Division, an expert's opinion of the effects of the health, safety and welfare of children and how it will protect through the alternative means of compliance.
4. A separate written request shall be submitted for each requirement for which alternative compliance is sought.

The approved alternative compliance is effective for the duration of the registration, unless

- a shorter time frame is requested or approved.
- 5. The granting of alternative compliance for a requirement shall in no way constitute a precedent. If an alternative means of complying with the requirement is granted by the Division and the facility fails to implement satisfactorily this alternate means, the original requirement for which alternative compliance was sought shall become immediately enforceable.
- 6. The Division shall have the right to obtain an expert opinion to corroborate that provided by the applicant/registrant.
- 7. The Division reserves the right to deny requests for alternative compliance when it finds that such request does not adequately protect the health, safety and welfare of children and does not meet the intent of the requirements.
- 8. All requests for alternative compliance shall be answered in writing by the Division.

2. Relative Child Care Family Home: a situation in which five or less children are cared for by a relative of the child (ren). The relationship must be that of grandparent, great-grandparent, aunt, uncle, sibling (residing out of the home).  - b. the parent's birth certificate
 - c. marriage license of the parent (if parent's last name has changed)

7. If at any time care is provided to six or more children from more than one family, the law requires the provider to be licensed. The caregiver's own preschool children shall be considered when determining the need for a license or registration. The caregiver's own school age children are not considered when determining the need for a license or registration. Other children in the home who are not accompanied by a parent are considered as being in care whether pay is received for the care or not.
8. Any home that has not provided care to children for a period of one year shall have the registration closed unless a written request is made by the registrant stating why closure should not take place.
